

Event FAQ

What do you need to set up?

We require access to a standard power outlet for our airbrush equipment. Our typical setup space is approximately **10' x 10'**.

Where should the airbrush station be located?

For the best experience, we recommend placing our station away from the DJ or loud speakers. This allows our team to hear guests clearly while taking orders and ensures smooth communication throughout the event.

How can we help the line move faster?

We encourage hosts or DJs to announce the airbrush station early in the event so guests can place their orders as soon as possible. Getting orders started early helps us keep the line moving and allows more guests to receive custom items.

Can we add an extra display table?

Yes! An additional table next to our station is a great place for completed items to be displayed for guest pickup. It creates an organized, easy pickup process and showcases the finished artwork.

Can you match my party theme?

Absolutely! We can create **custom stencil designs** that match your event theme, logo, school, team, or celebration. We also offer premium design upgrades to make your event even more memorable.

How many items can you paint?

Our production speed varies depending on the item and design, but on average, one artist can complete:

- **Up to 25 hats per hour**
- **Up to 20 shirts, hoodies, or tote bags per hour**

Is airbrushing messy?

Not at all! Our airbrush process is clean and professional. We take pride in leaving our workspace exactly as we found it.

How should I care for my custom airbrush shirt?

For the longest-lasting design, we recommend waiting a few days before washing your shirt. Turn it inside out and wash it in cold water. Air drying or using a low-heat setting is recommended.

Will adults enjoy the airbrush station too?

Definitely! Airbrush keepsakes are a hit with guests of all ages. Kids love watching their items come to life, and adults often have just as much fun creating personalized hats, shirts, hoodies, and more.

How does the airbrush station work?

Our setup includes an assistant who manages the order line and helps guests choose their personalization. Guests select:

- Font style
- Paint colors
- Design options
- The name or wording they'd like added

Once the order is placed, our artist creates each item live on the spot, giving guests both a personalized keepsake and an entertaining experience to watch.
